  </body>
</html>
```

Code Boot Camp Pt. 2

3) Write an HTML page

- Write out the basic HTML page
- Add the page title
- Add the code snippet inside the page body.

Basic page

```
<html>
  <head>
    <title>
    </title>
  </head>
  <body>
  </body>
</html>
```

Page title

Cell phone reviews

Code snippet

```
<p>
  Smart phones are cool.
</p>
<p>
  Most screens are glossy.
</p>
```

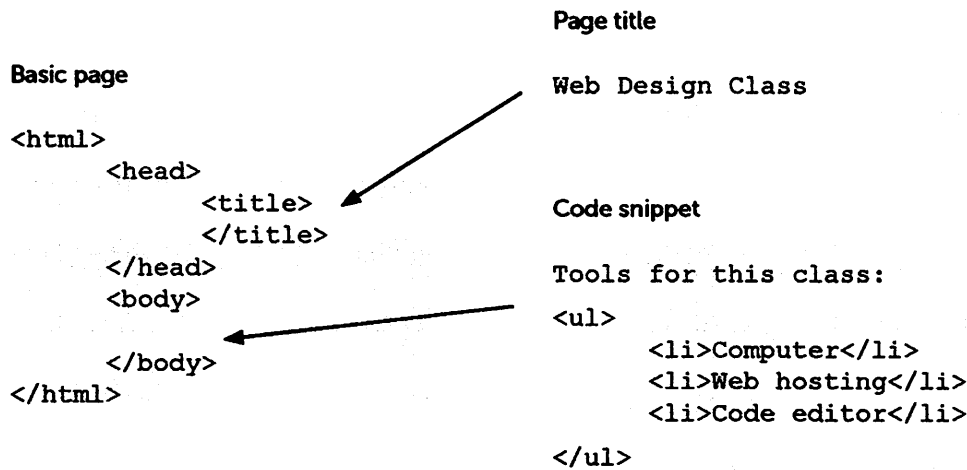

↓ Your code

```
<html>
  <head>
    <title>
      cell phone reviews
    </title>
  </head>
  <body>
    <p> smart phones are cool.
    </p>
    <p> Most screens are glossy.
    </p>
  </body>
</html>
```

Code Boot Camp Pt. 2

4) Write an HTML page

- Write out the basic HTML page
- Add the page title
- Add the code snippet inside the page body.

↓ Your code

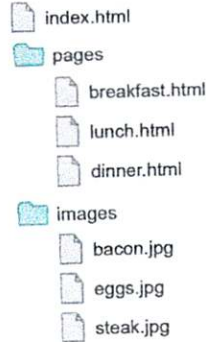

```
<html>
  <head>
    <title>
      Web Design Class
    </title>
  </head>
  <body>
    Tools for this class:
    <ul>
      <li> Computer </li>
      <li> Web hosting </li>
      <li> code editor </li>
    </ul>
  </body>
</html>
```

HTML links and images

Use the diagram to complete the following

``

awesomehausbrewery.com

Fix this

Circle or add items that are incorrect or missing with the following html page. Rewrite the code correctly below.

```
<html>
  <head>
    <title>Sam's restaurant</title>
    <h1>Sam's Restaurant<p></h1>Sam's Restaurant is a
    cozy, place for locals to grab a bite.</p>
  </body>
</html>
```

```
<html>
  <head>
    <title> sam's restaurant </title>
  </head>
  <body>
    <h1> Sam's Restaurant </h1>
    <p> Sam's Restaurant is a cozy, place for
    locals to grab a bite.
  </p>
  </body>
</html>
```

Code Boot Camp Pt. 2

Make this

Write a full html page that includes the following

- A. Page title, "Molly's Diner & Bakery"
- B. Level 1 headline saying, "Welcome to Molly's Diner & Bakery"
- C. A paragraph describing Molly's Diner & Bakery (make up a short paragraph)
- D. A numbered list with directions to the restaurant (3 steps)
- E. An image of bacon
- F. A link to a breakfast menu page (don't code the breakfast page)
- G. Draw the file directory including the bacon image and breakfast page

↓ Your code

```
<html>
  <head>
    <title>
      Molly's Diner & Bakery
    </title>
  </head>
  <body>
    <h1>
      Welcome to Molly's Diner & Bakery
    </h1>
    <p>
      Molly's is a great place to eat...
    </p>
    <ol>
      <li> From highway 1N, exit at Clayton Way. </li>
      <li> Turn right onto Sycamore Parkway. </li>
      <li> Turn left onto 4th st. The diner is on your Right. </li>
    </ol>
    
    <a href="pages/breakfast.html"> go to breakfast </a>
  </body>
</html>
```

↓ File directory

```
index.html
└─ images
    └─ bacon.jpg
└─ pages
    └─ breakfast.html
```
