

Block vs inline elements

Circle the elements that are block elements

`<div></div>`

`<p></p>`

``

`<h1></h1>`

``

`<a>`

``

``

CSS selection

Use diagram1 to write the style tag and css code that will do the following

- Make h1 blue
- Make the breakfast images have dotted green borders
- Make the breakfast link have no underline
- Make the font size of the listed hours be 9px
- Make the listed hours for sunday only have a red background
- Make the "We're open for breakfast" paragraph 60px tall, and 300px wide

CSS selection

Use diagram 2 to write the html ids & classes, and then the style tag with css code that will do the following

- Make 'Dinner Served All Day' have a dotted border.
- Make h1 blue
- Make the first image have a 3px blue border
- Make all the links have no underline
- Make the Dinner Menu text have a purple background
- Make the Dinner Menu items be font size of 9px
- Make all daily specials have a yellow background, except Sunday which should be white text on a red background
- Make the Home link italic

```
<style>
```

```
#dinner-subtitle { border: dotted 1px black; }
```

```
</style>
```
