

## Code Boot Camp Pt. 2

### Basic Page

Write out the code for a basic, empty html page.

### Fix this

Circle or add items that are incorrect or missing with the following html page. Rewrite the code correctly below.

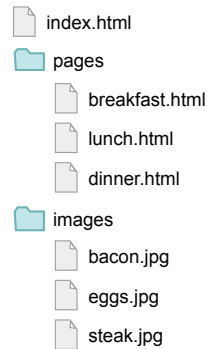

```
<html>
  <title>Sam's restaurant</title>
  <h1>Sam's Restaurant<p></h1>Sam's Restaurant is a
cozy, place for locals to grab a bite.</p>
</body>
</html>
```

## HTML links and images

Use the diagram to complete the following

1. Write the html tag linking `breakfast.html` to `index.html`  
`<a href="../index.html">home</a>`
2. Write the html tag linking `index.html` to `breakfast.html`
3. Write the html tag linking `lunch.html` to `breakfast.html`
4. Write the img tag to add `eggs.jpg` to `breakfast.html`  
``
5. Write the img tag to add `steak.jpg` to `dinner.html`
6. Write the img tag to add `bacon.jpg` to `index.html`

awesomehausbrewery.com

## CSS

Write the html and css code that creates the following

7. A level 1 headline, in blue text  
`<h1 style="color: blue;">My awesome brewery</h1>`
8. A paragraph, black background, white text
9. A bulleted list, with a border around the whole list
10. An image with a 4px red border
11. A numbered list with a yellow background behind each list item
12. A level 3 headline in tahoma font

## Make this

Write a full html page that includes the following

- Page title, "Molly's Diner & Bakery"
- A lvl 1 headline saying, "Welcome to Molly's Diner & Bakery" in Arial font
- A short paragraph describing Molly's Diner & Bakery(make up a short paragraph) with a blue background
- A numbered list with fake directions to the restaurant (at least 5 steps) with a red border
- Add an image of bacon
- Add a link to a breakfast menu page (don't code the breakfast page)
- Draw the file directory including pages, images that are referenced
