

HTML/CSS Self-quiz

Add the HTML and CSS necessary to change the before preview to the after preview.

Base HTML

```
<body >
  <h1 >How to change a lense in a camera</h1>
  <p >This guide will walk you through changing a lense in a DSLR camera.</p>
  <h2 >The Guide</h2>
  <h3 >Step 1: Inspection</h3>
</body>
```

CSS

Before

How to change a lense in a camera

This guide will walk you through changing a lense in a DSLR camera. While it may seem simple, there are a lot of places where problems can arise. With this guide, you will be able to change a lense without risking damage to your camera, lense, or person.

The Guide

Step 1: Inspection

After

How to change a lense in a camera

This guide will walk you through changing a lense in a DSLR camera.

The Guide

Step 1: Inspection

Base HTML

```
<h3 >Step 2: Removal</h3>
<p >Removing the lense is usually pretty simple.</p>
<ol >
  <li>Locate the button on the camera that will relif it has one.</li>
  <li>Hold the button down (if it has one) and rotaring until the dots line up</li>
  <li>Carefully remove the lense.</li>
  <li>Cap the lense, body and lense side, making suresecure.</li>
</ol>
```

CSS

Before

Step 2: Removal

Removing the lense is usually pretty simple, provided you are in a dust and sand free area.

1. Locate the button on the camera that will release the lense, if it has one.
2. Hold the button down (if it has one) and rotate the lense or ring until the dot on the lense lines up with the dot on the camera
3. Carefully remove the lense.
4. Cap the lense, body and lense side, making sure both sides are secure.

After

Step 2: Removal

Removing the lense is usually pretty simple.

1. Locate the button on the camera that will release the lense, if it has one.
2. Hold the button down (if it has one) and rotate the lense or ring until the dots line up
3. Carefully remove the lense.
4. Cap the lense, body and lense side, making sure both sides are secure.

Base HTML

```
<h3>Step 4: Finish up</h3>
<p>Now is the time to do the clean up and final prep</p>
<ul>
  <li>Put the old lense away</li>
  <li>Attatch any filters</li>
  <li>Attatch the lense hood (if any)</li>
  <li>take more photos</li>
</ul>
```

CSS

Before

Step 4: Finish up

Now is the time to put the old lense away, and to apply any filters, a lens hood, and white balance the camera with the new lense.

- Put the old lense away
- Attatch any filters
- Attatch the lense hood (if any)
- take more photos

After

Step 4: Finish up

Now is the time to do the clean up and final prep

- Put the old lense away
- Attatch any filters
- Attatch the lense hood (if any)
- take more photos
