CSS selection

Match the css to the html it selects by drawing a line. The first 2 have been done for you.

1. `h2 {}`

2. `.breakfast {}`

3. `#bk-392 {}`

4. `.eggs p {}`

5. `#bk-101 h2 {}`

6. `span.price {}`

7. `.eggs div {}`

8. `p.includes {}`

9. `.eggs h2 {}`

10. `.breakfast .includes{}`

```html
<div class="breakfast">
    <p class="includes">
        Served with your choice of fruit,
        toast or hash-browns
    </p>

    <div class="eggs">
        <div id="bk-101">
            <h2>Breakfast Scramble</h2>
            <span class="price">$7.23</span>
            <p>
                3 eggs scrambled with sausage,
                bell peppers and cheese
            </p>
        </div>

        <div id="bk-123">
            <h2>Eggs and toast</h2>
            <span class="price">$5.32</span>
            <p>
                2 eggs, bell peppers and cheese
            </p>
        </div>

        <div id="bk-392">
            <h2>Eggs Benedict</h2>
            <span class="price">$8.68</span>
            <p>
                2 poached eggs over canadian
                bacon and english muffins
            </p>
        </div>
    </div>
</div>
```

	CSS Write the css selections for the given html.	HTML Fill in the html tags selected by the css. If the html tag name isn't known, use a ?
11.	.article {}	`<? class="article"> </?>`

12.	a img {}	`<a>`
		   `<img>`
		`</a>`

13.	h2#page-212 {}	`<h2 id="page-212"> </h2>`
14.	#header-img {}	`<? id="header-img"> </?>`

	CSS Write the css selections for the given html.	**HTML** Fill in the html tags selected by the css. If the html tag name isn't known, use a ?
15.	.hours { }	`<? class="hours"></?>`
16.	div h4 { }	`<div> <h4></h4></div>`
